

Threshold by Hispanic ethnicity (GAD model)

Empirical distribution

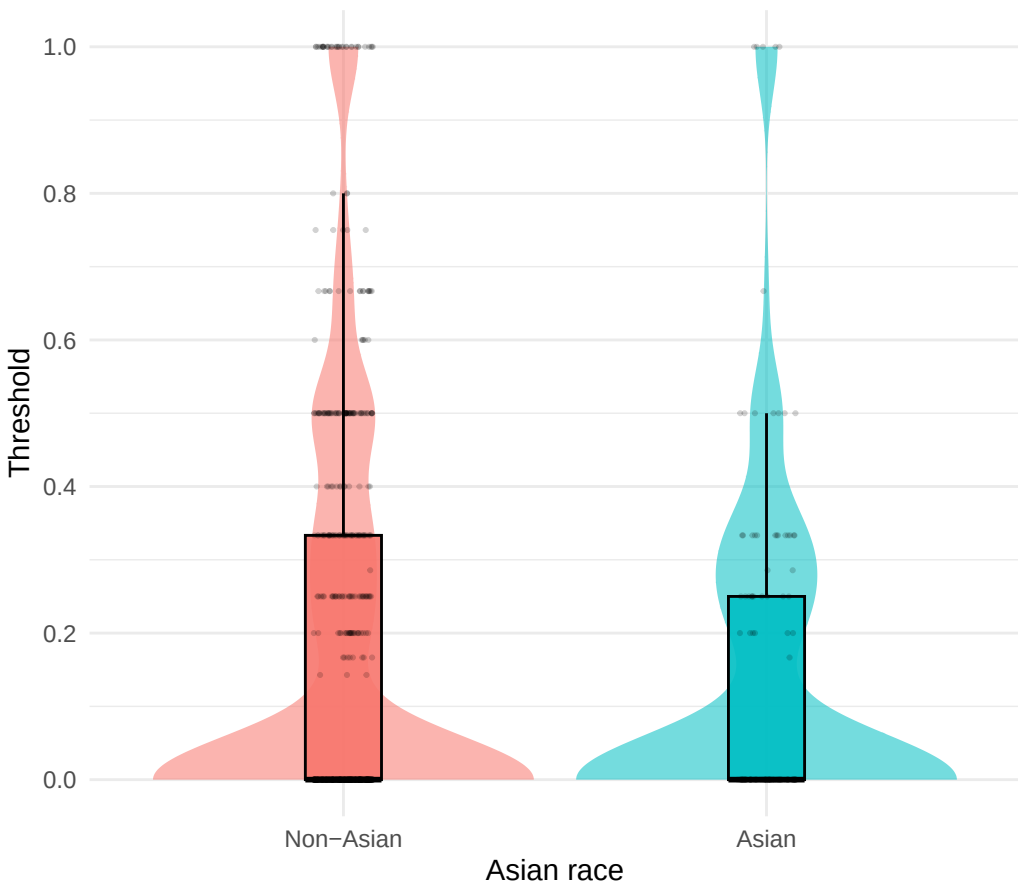

Model-predicted threshold (95% CI)
(avg over other covariates)

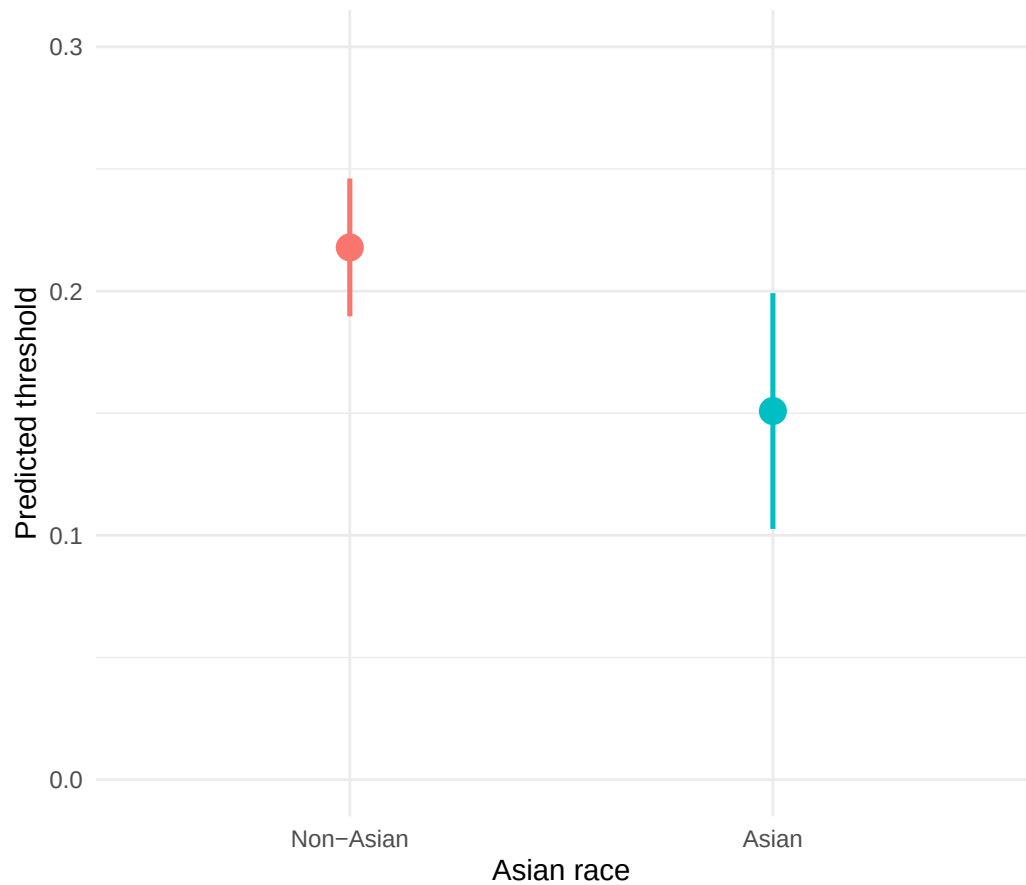

Threshold by Asian race (GAD model)

Empirical distribution

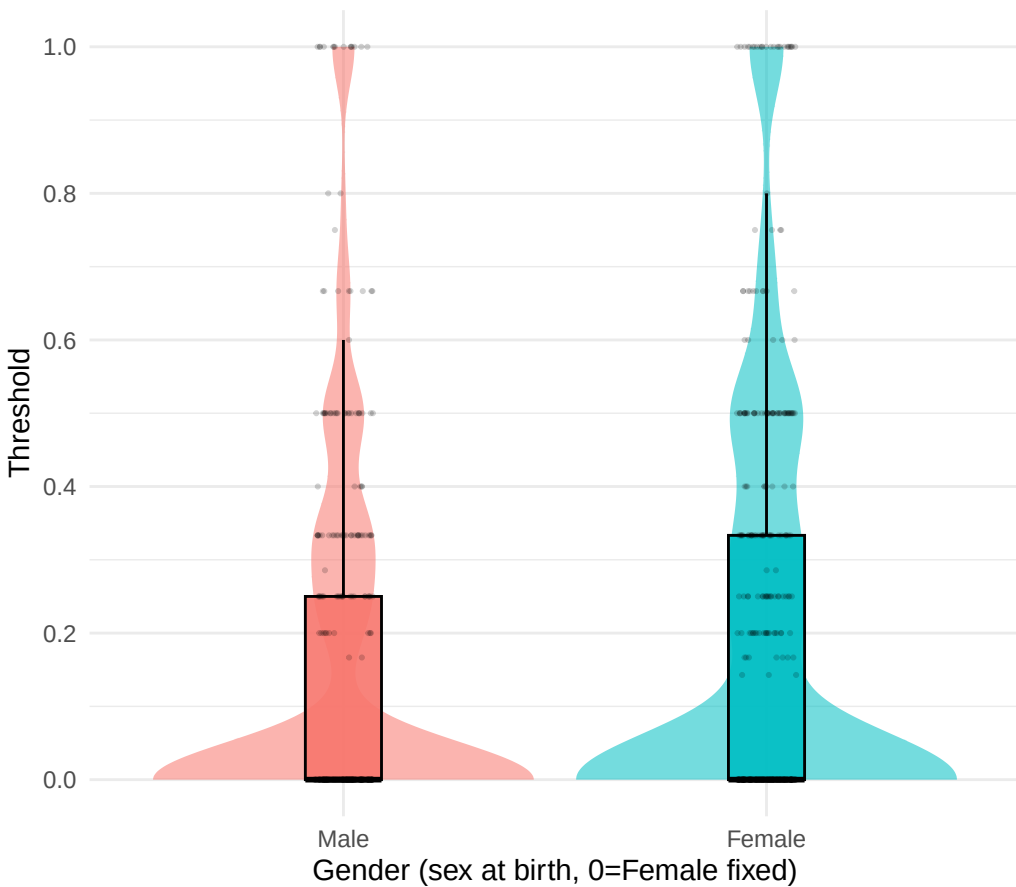

Model-predicted threshold (95% CI)
(avg over other covariates)

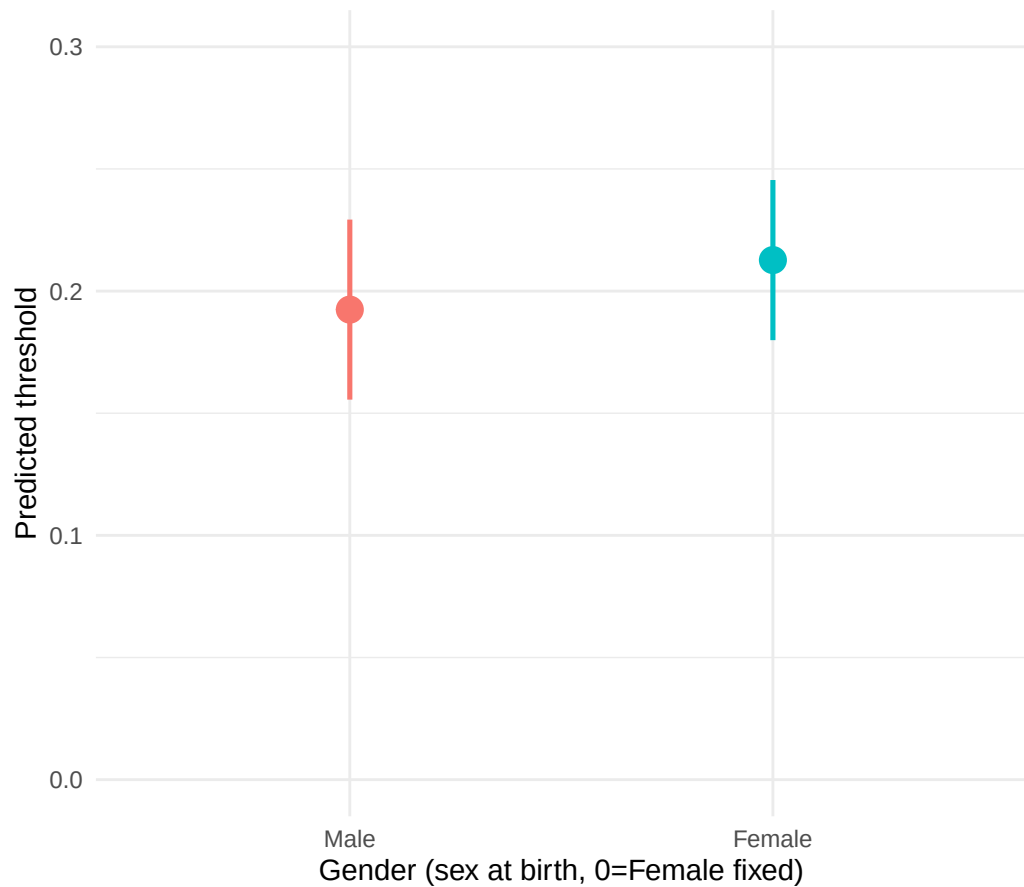

Threshold by Gender (sex at birth, 0=Female fixed) (GAD model)

Empirical distribution

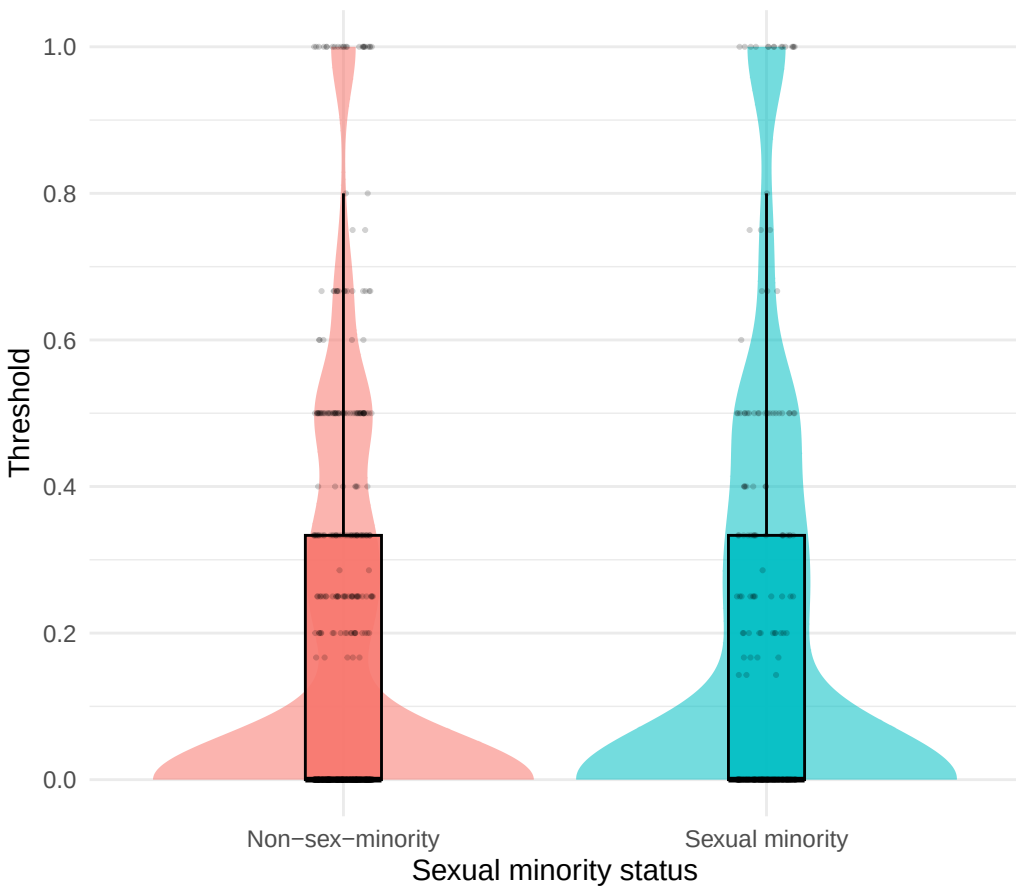

Model-predicted threshold (95% CI) (avg over other covariates)

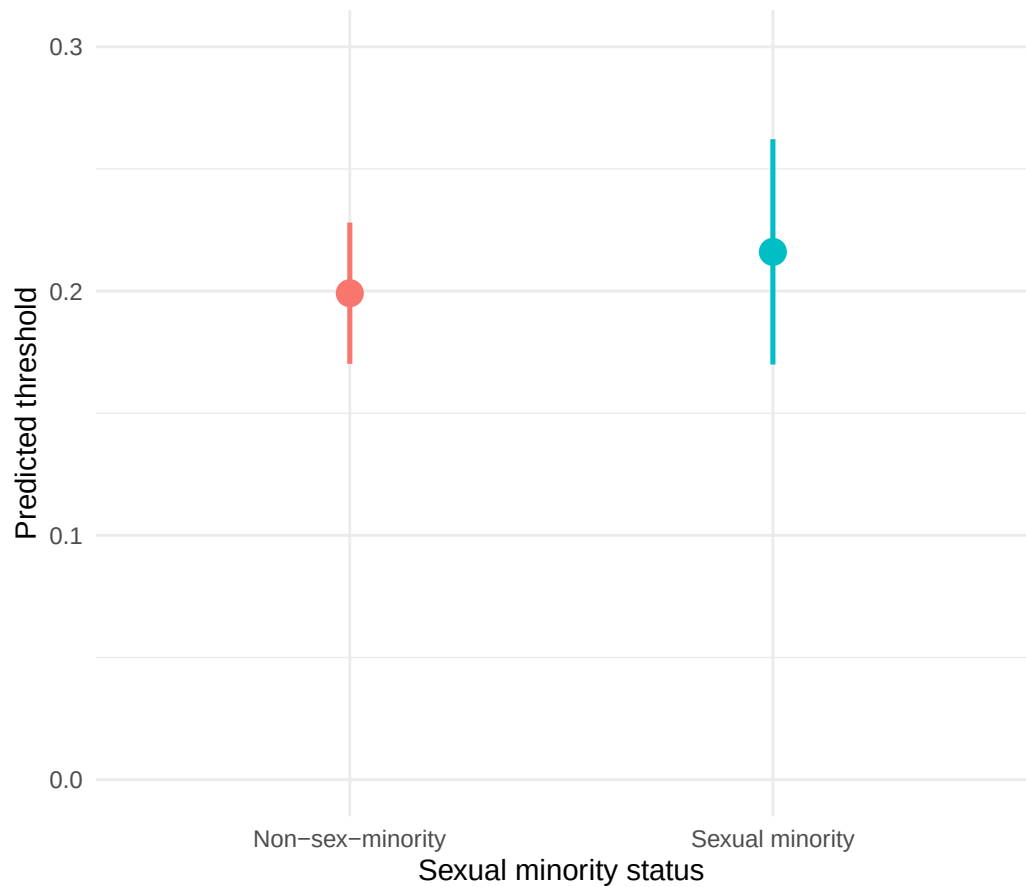

Threshold by Sexual minority status (GAD model)

Empirical distribution

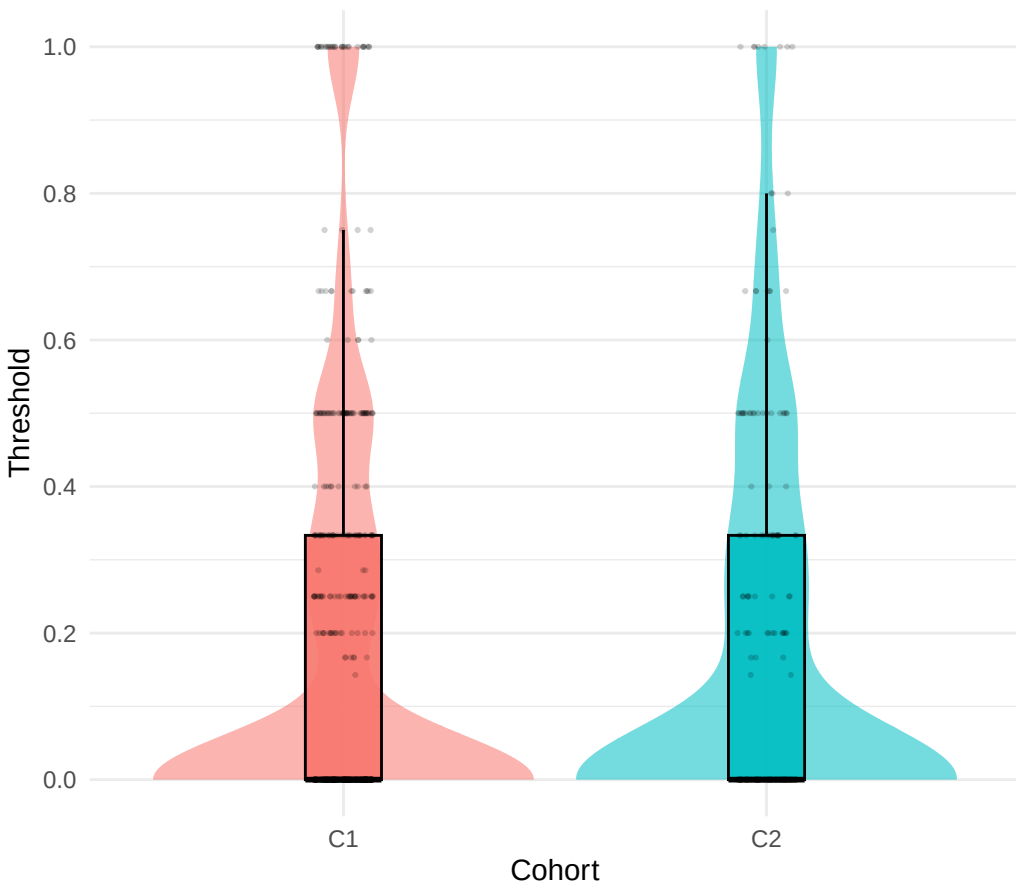

Model-predicted threshold (95% CI)
(avg over other covariates)

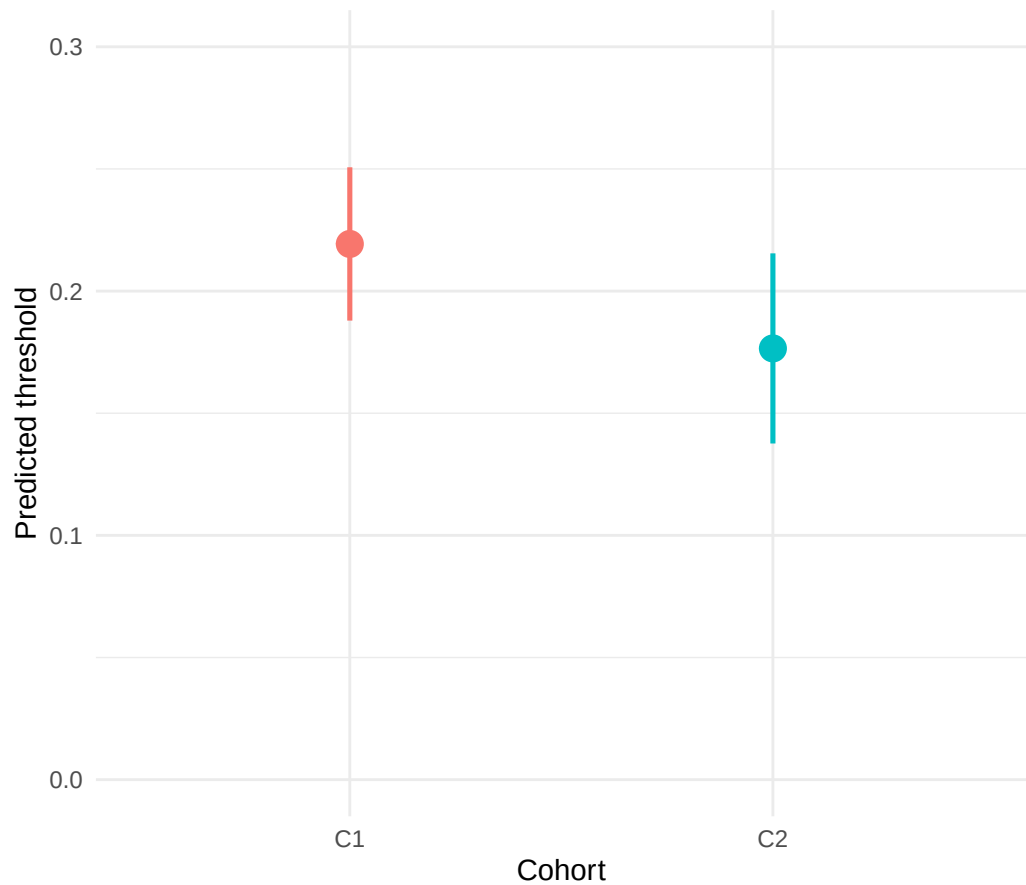

Threshold by Cohort (GAD model)

Empirical distribution

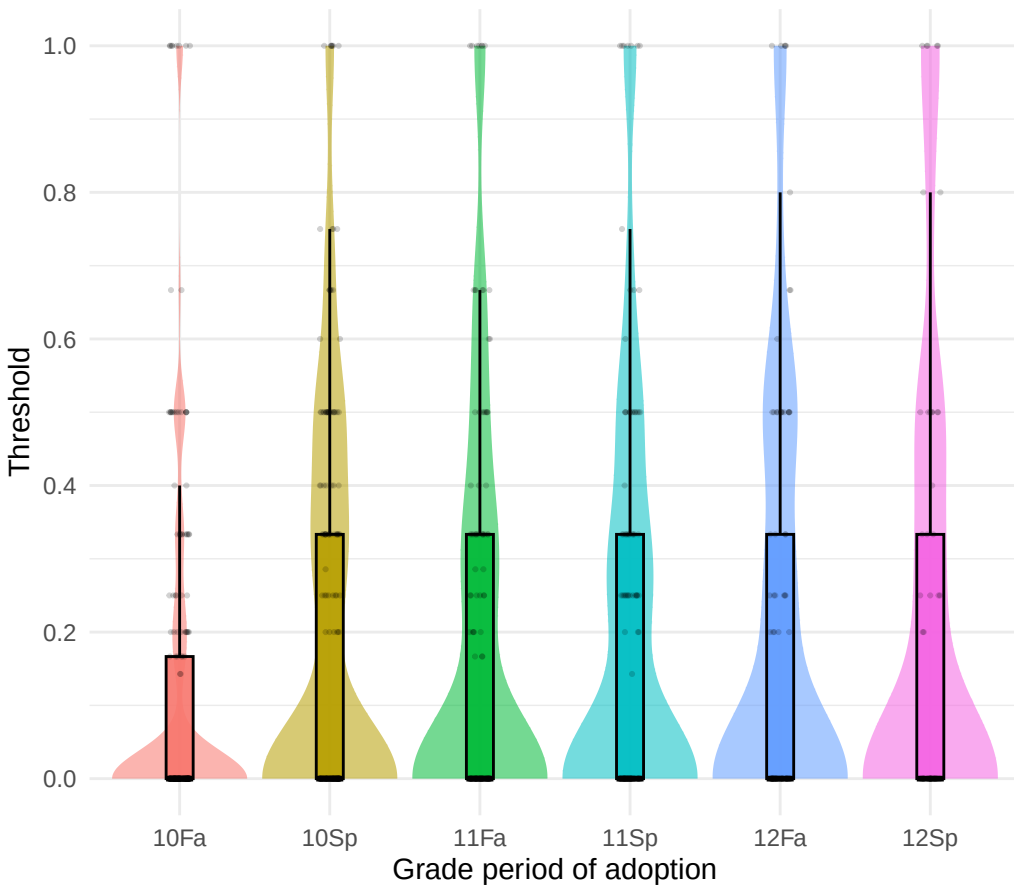

Model-predicted threshold (95% CI)
(avg over other covariates)

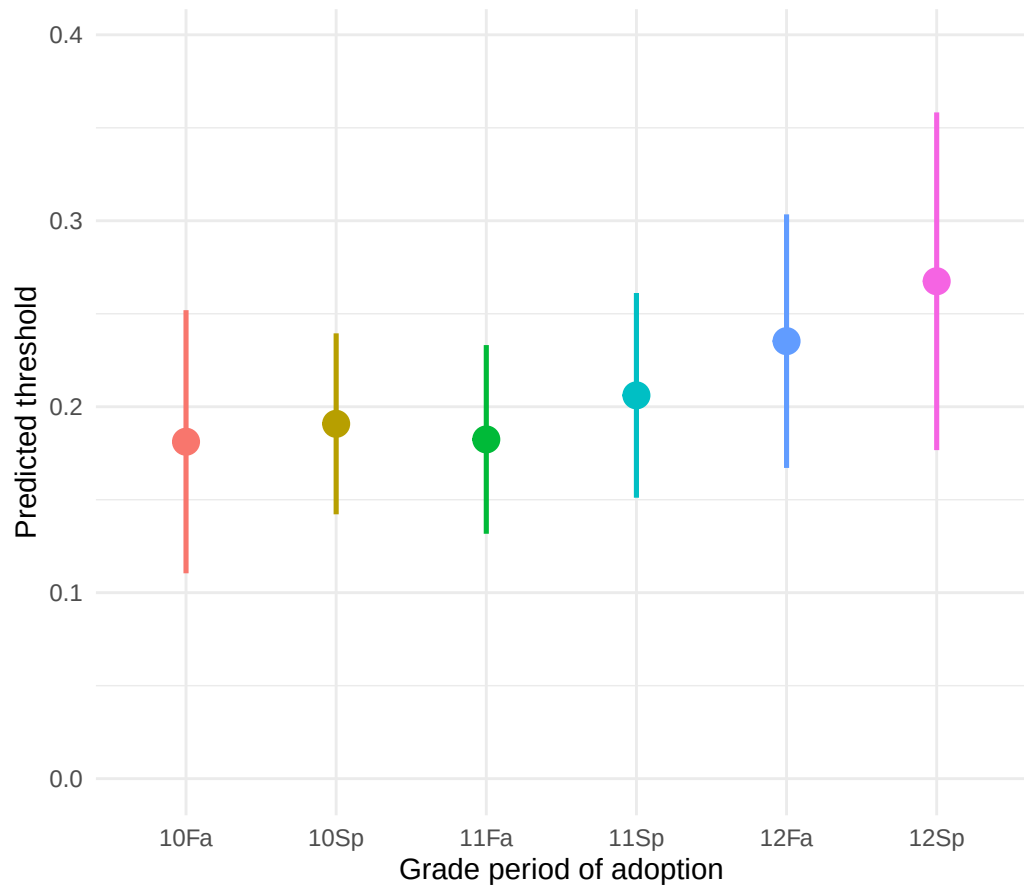

Threshold by Grade period of adoption (GAD model)

Empirical distribution

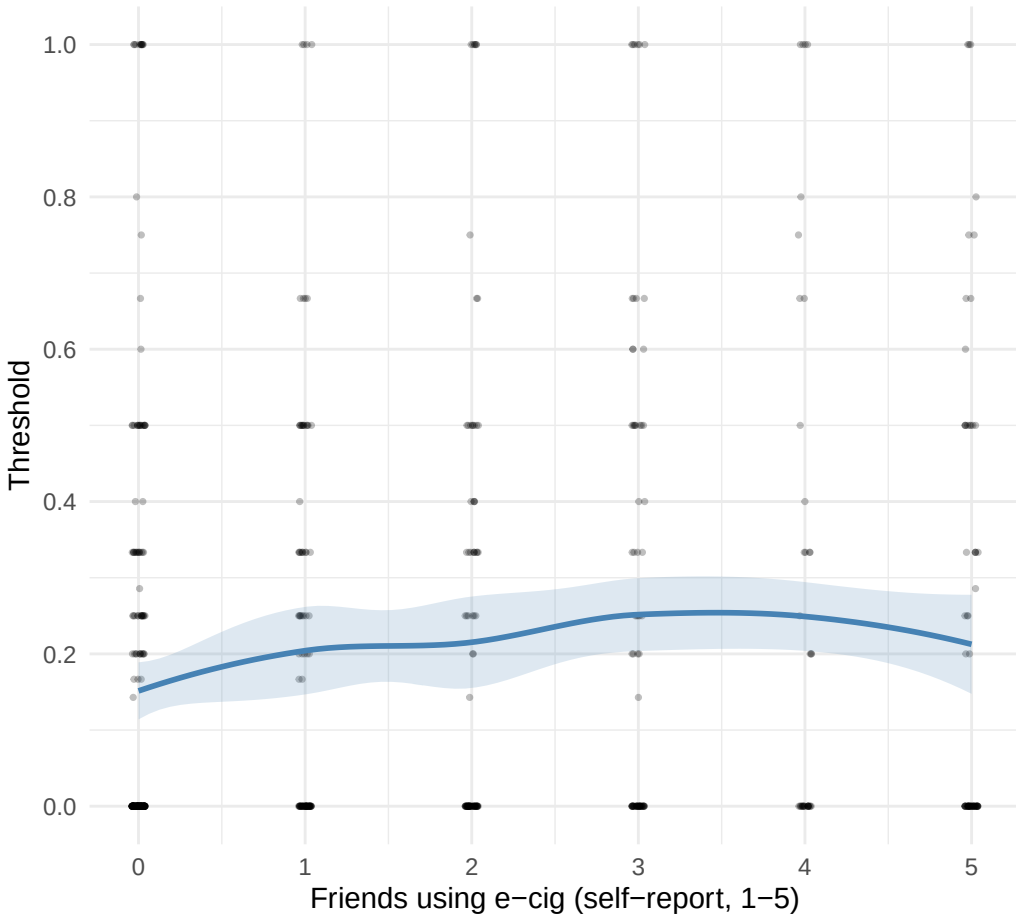

Model-predicted threshold (95% CI)
(avg over other covariates)

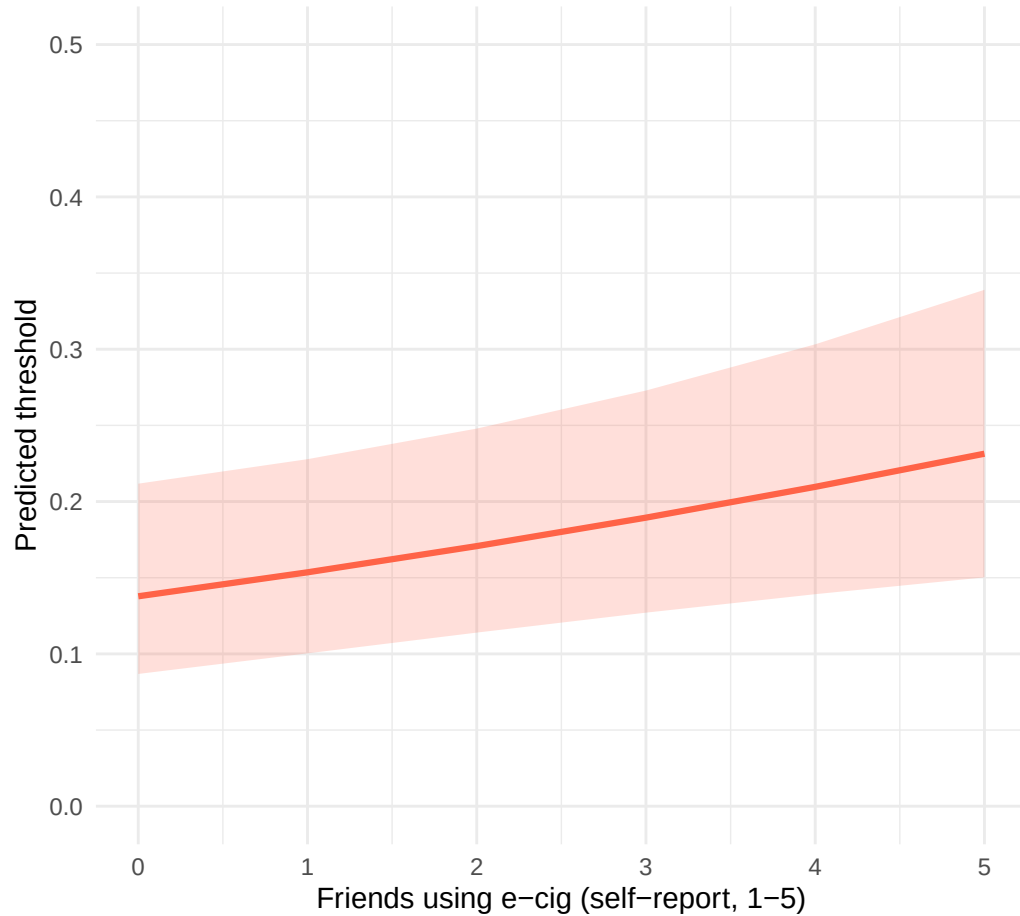

Threshold by perceived friend e-cig use (GAD model)

Empirical (jitter + LOESS)

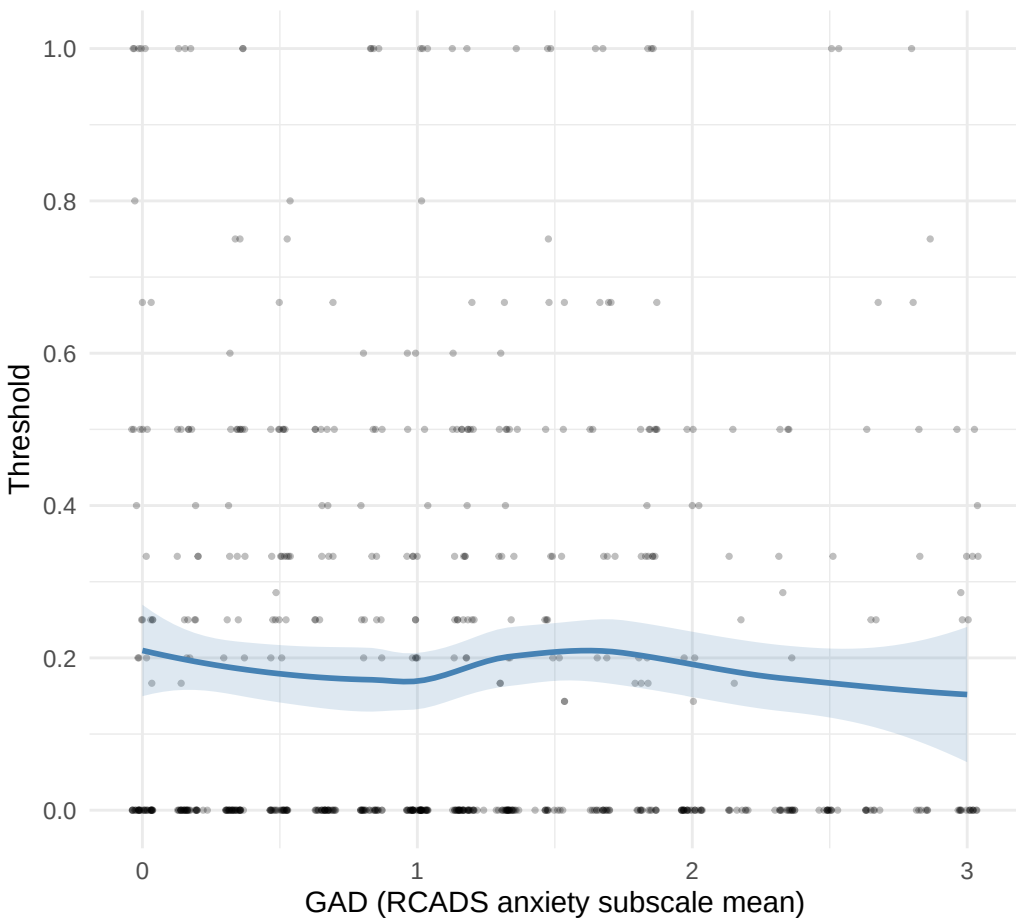

Model-predicted (95% CI)

Threshold by GAD (anxiety) at TOA

Empirical (jitter + LOESS)

Model-predicted (95% CI)
