

Threshold by Hispanic ethnicity (Grouped binomial, MDD)

Empirical (non-isolates only)

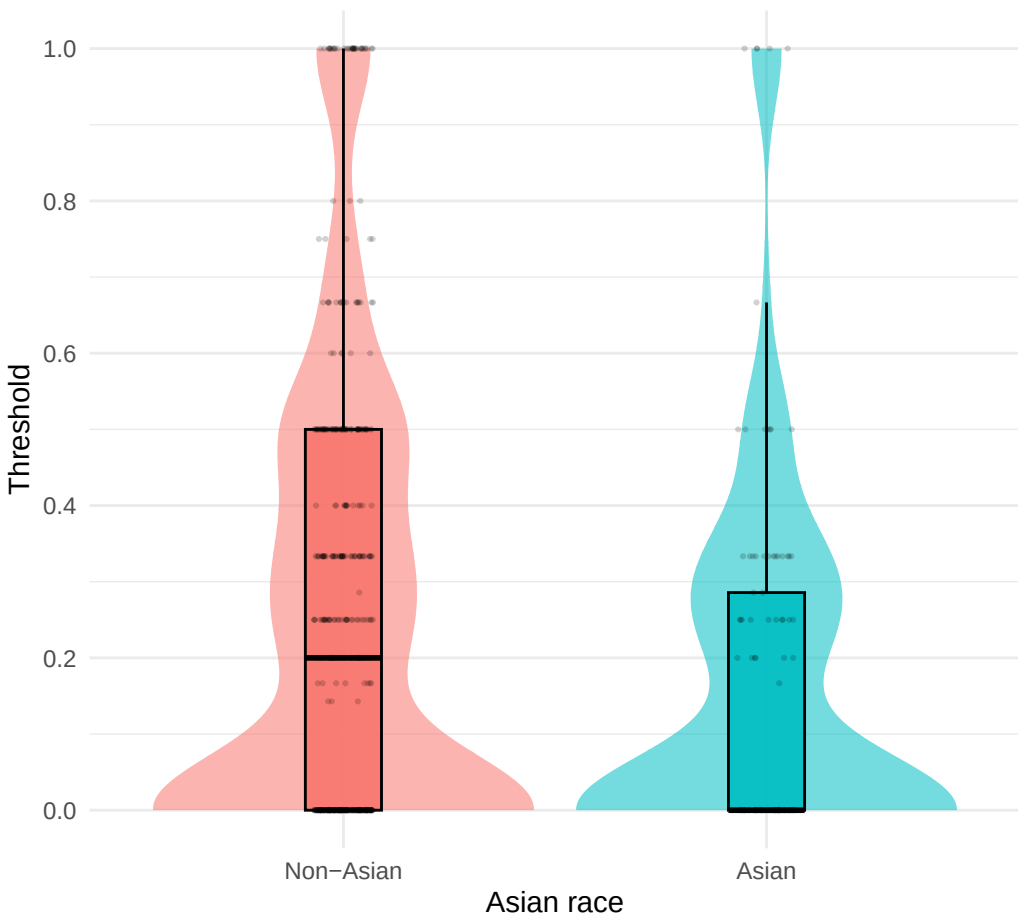

Grouped binomial – predicted prob alter is using (95% CI)

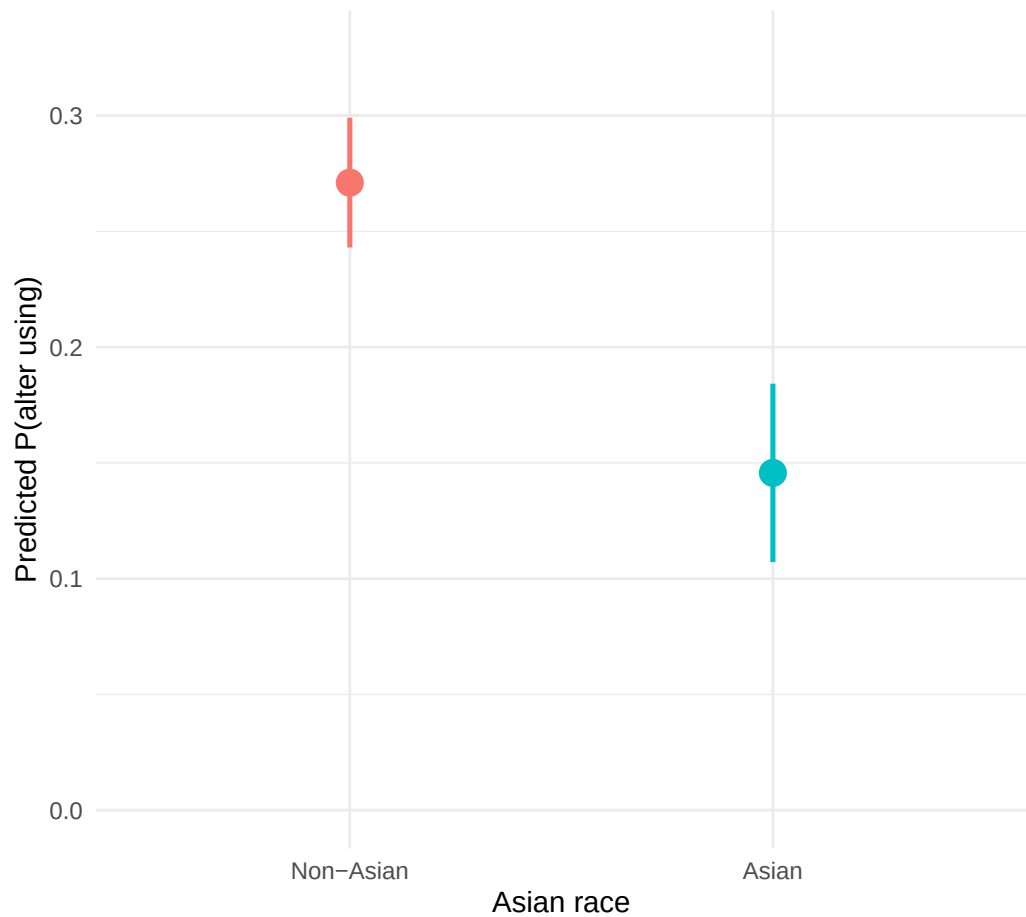

Threshold by Asian race (Grouped binomial, MDD)

Empirical (non-isolates only)

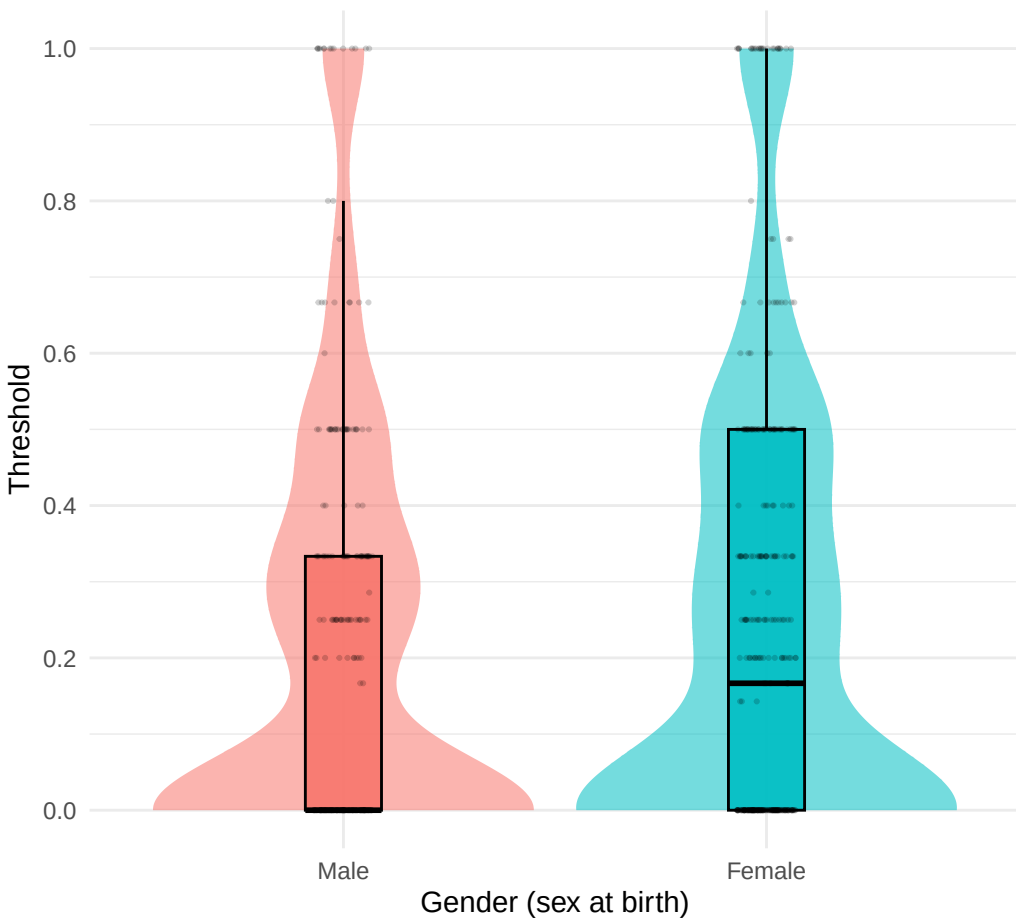

Grouped binomial – predicted prob alter is using (95% CI)

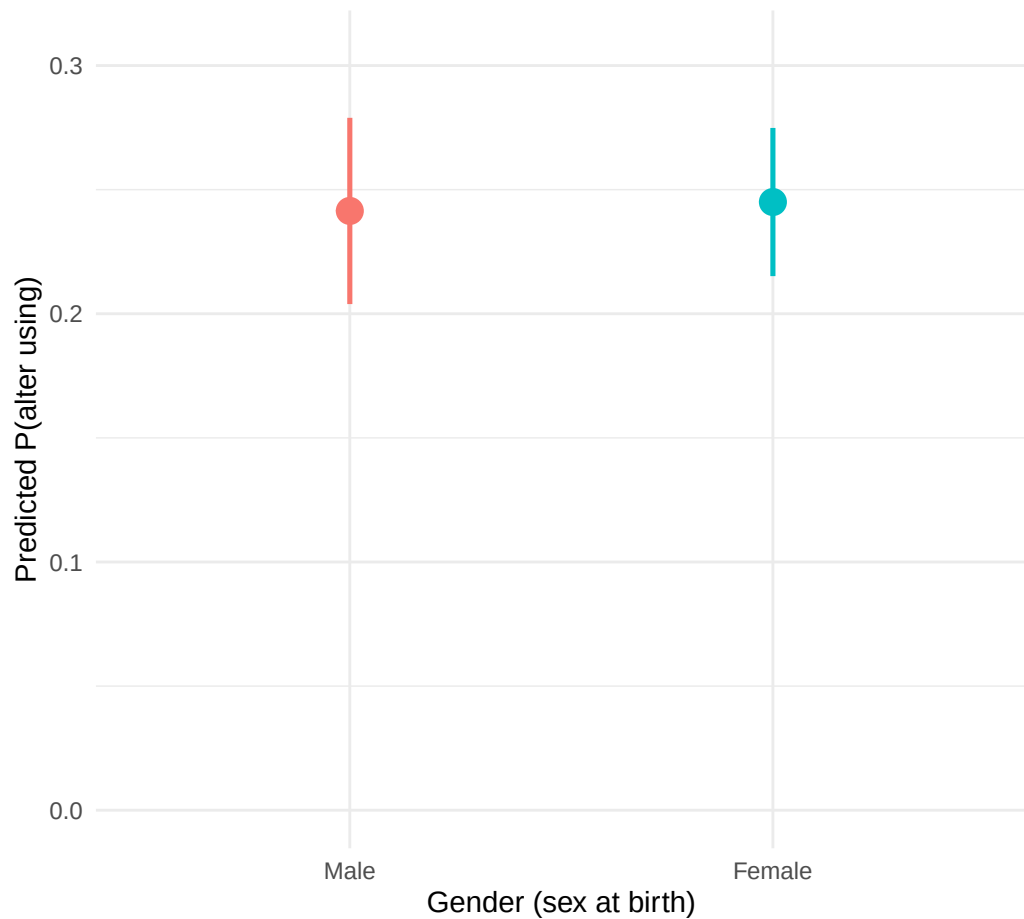

Threshold by Gender (sex at birth) (Grouped binomial, MDD)

Empirical (non-isolates only)

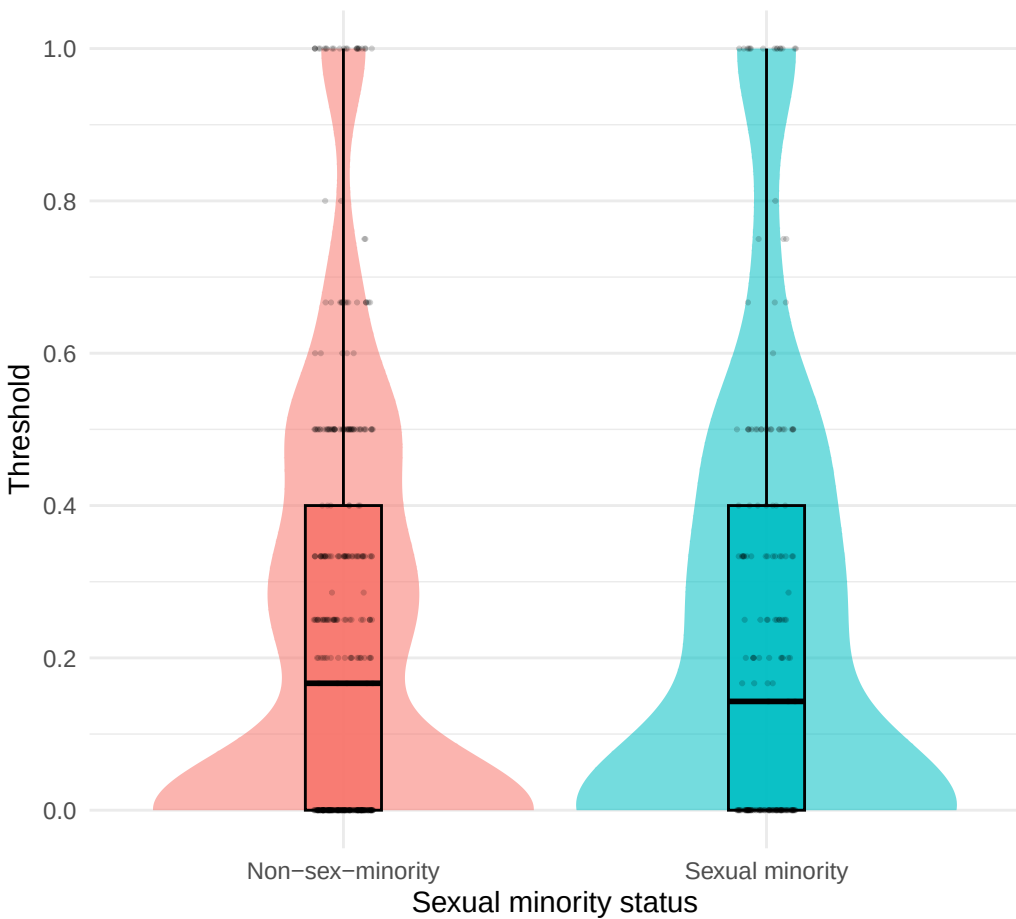

Grouped binomial – predicted prob alter is using (95% CI)

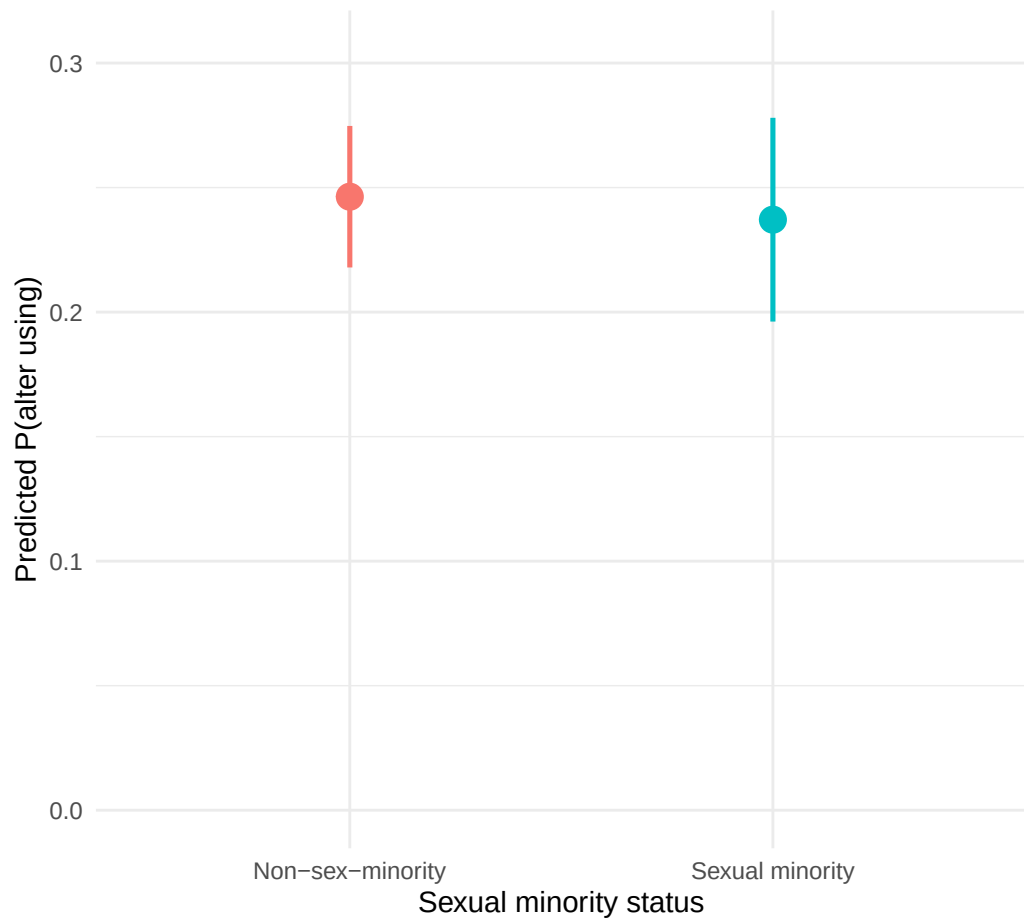

Threshold by Sexual minority status (Grouped binomial, MDD)

Empirical (non-isolates only)

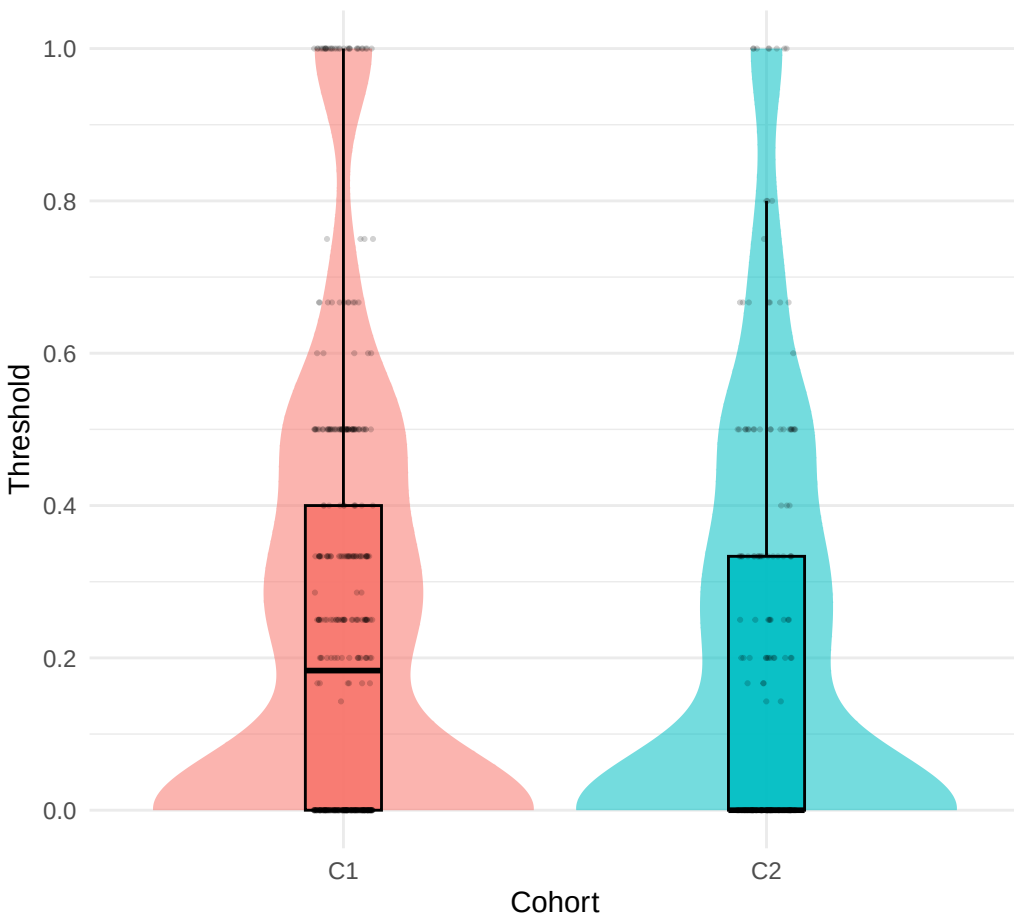

Grouped binomial – predicted prob alter is using (95% CI)

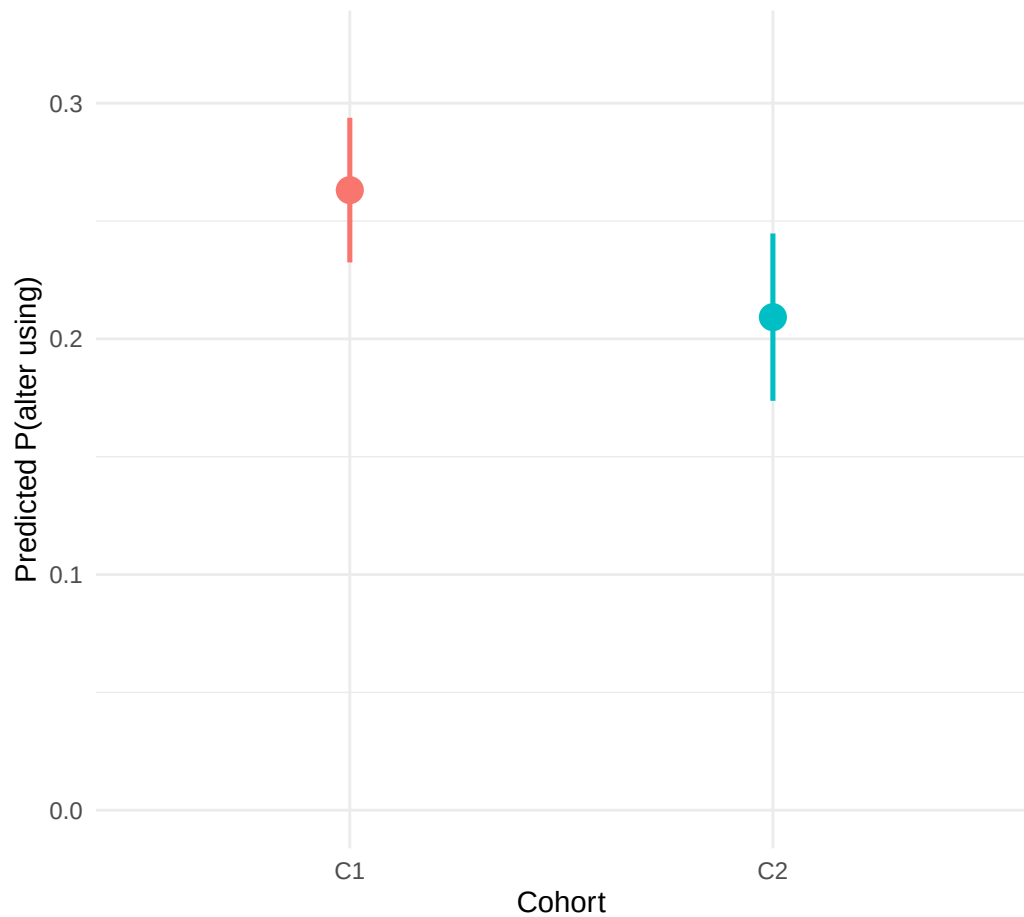

Threshold by Cohort (Grouped binomial, MDD)

Empirical (non-isolates only)

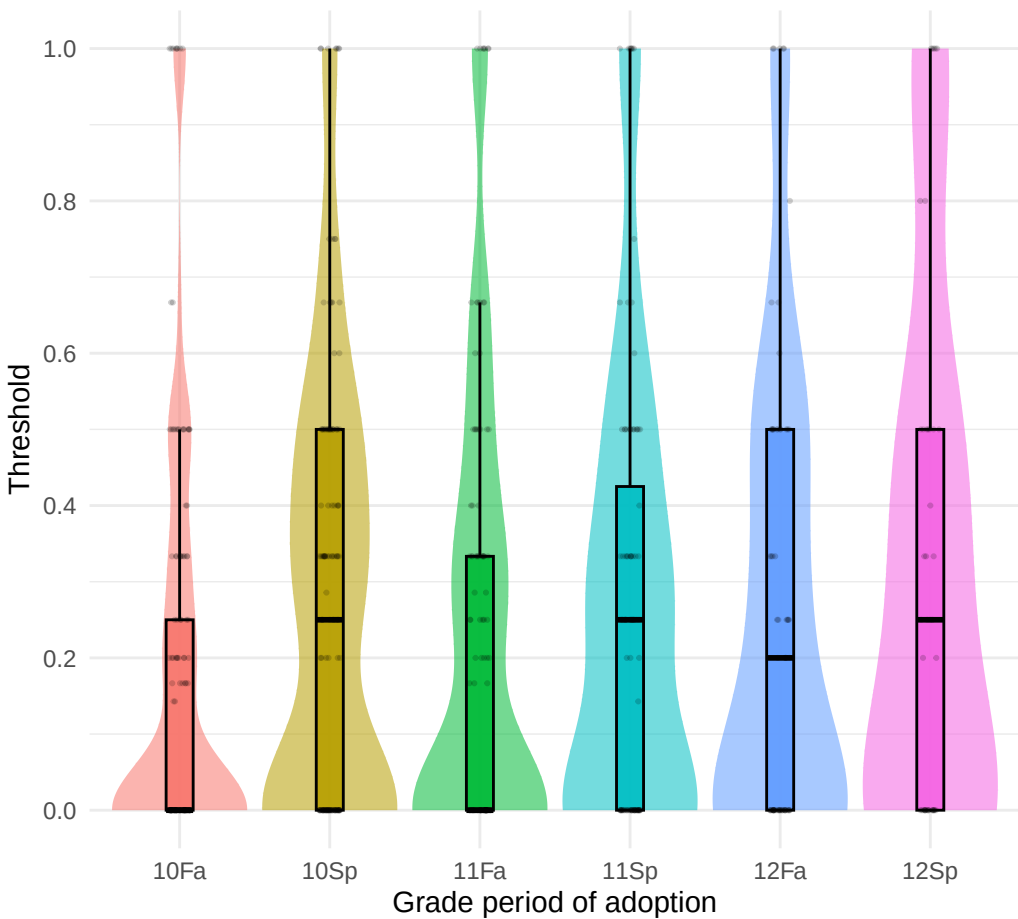

Grouped binomial – predicted prob alter is using (95% CI)

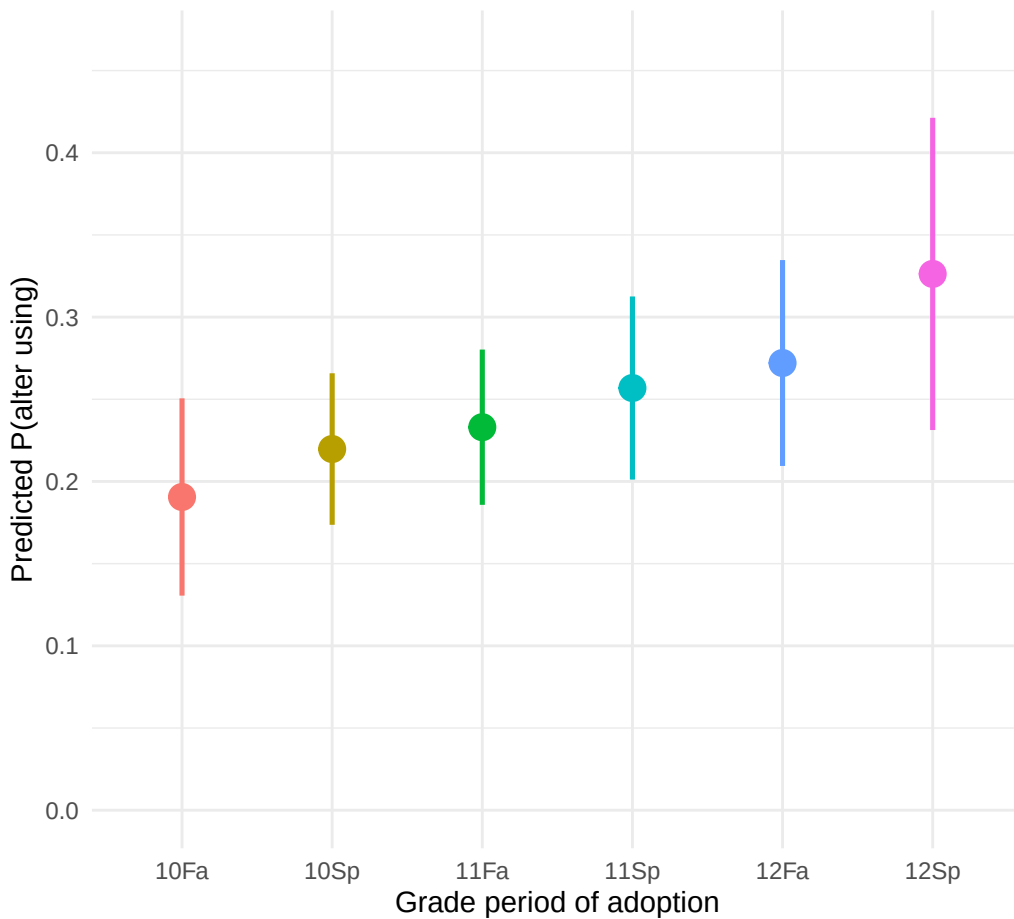

Threshold by Grade period of adoption (Grouped binomial, MDD)

Empirical (non-isolates only)

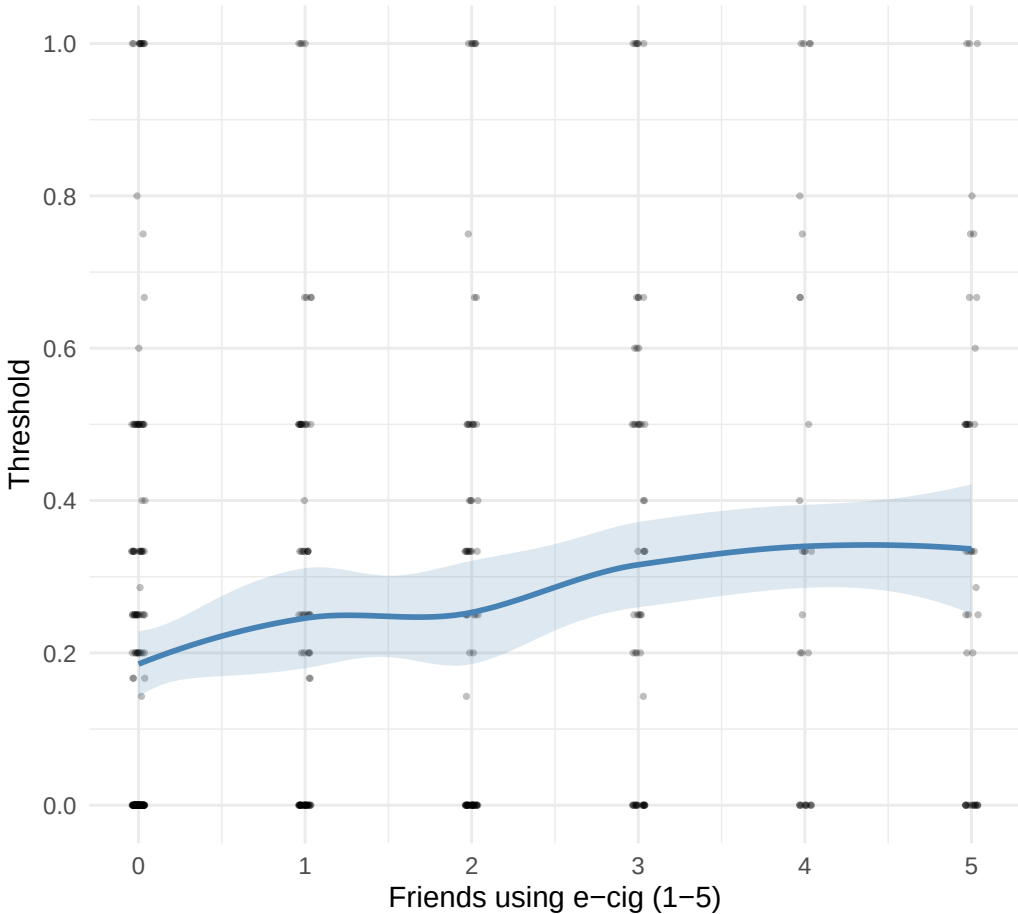

Grouped binomial – predicted prob alter is using (95% CI)

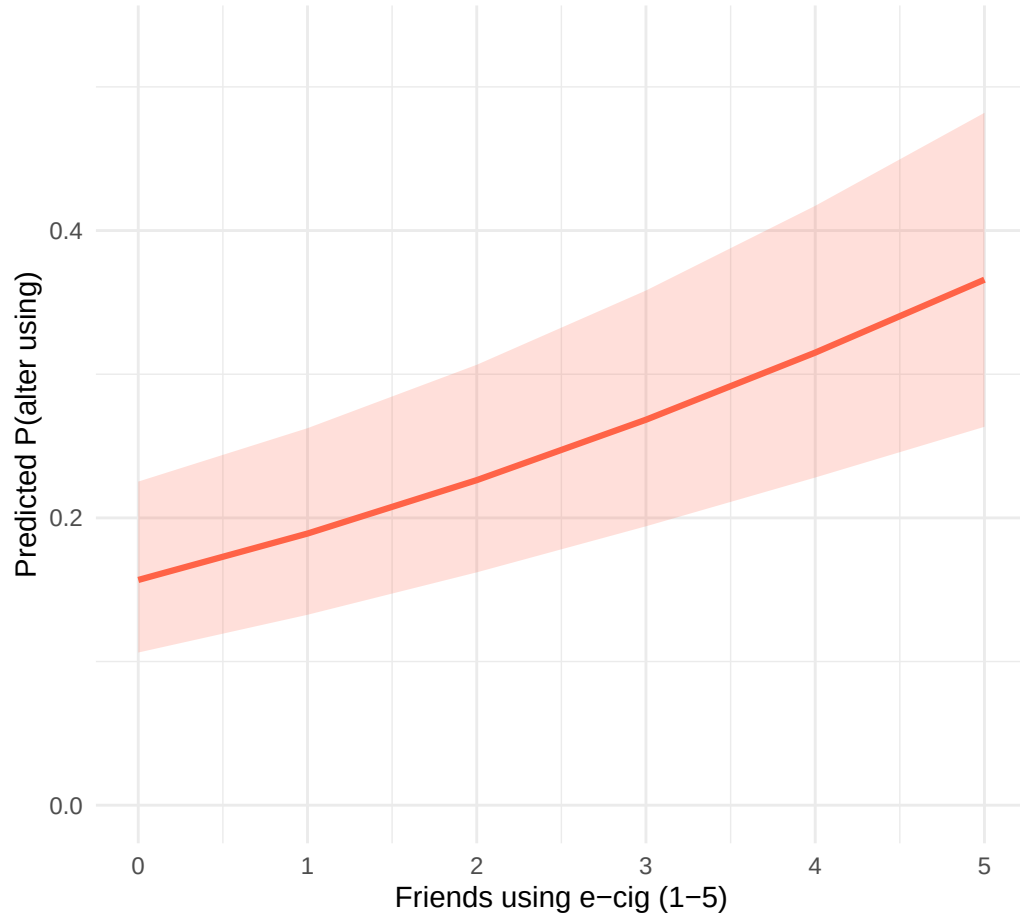

Threshold by perceived friend use (Grouped binomial, MDD)

Empirical (non-isolates) + LOESS

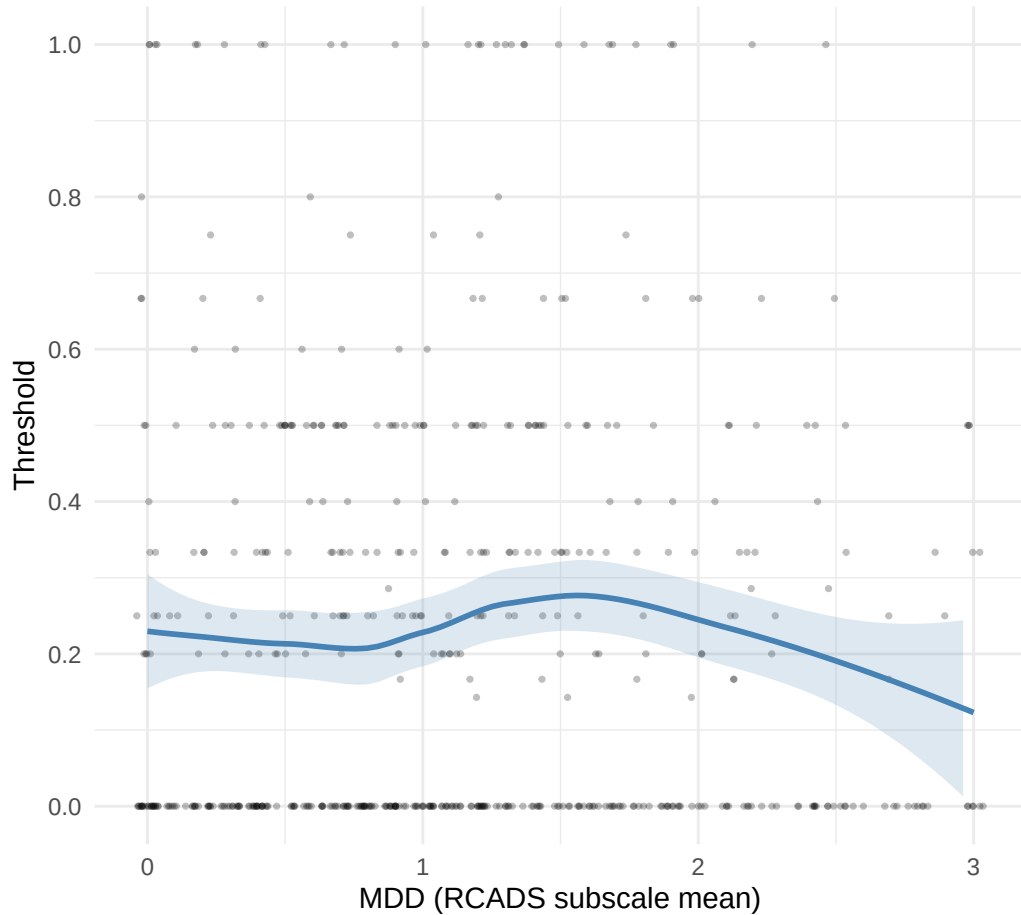

Grouped binomial – predicted (95% CI)

Threshold by MDD at TOA (Grouped binomial)

Empirical (non-isolates) + LOESS

Grouped binomial – predicted (95% CI)
